

Dear National Chemistry Week Supporters,

We are looking for volunteers again to help take some hands on science demos to 4th and 5th grade students in local schools. The Northern Oklahoma Chapter of the American Chemical Society (NOKACS) celebrates the 30th year of National Chemistry Week this year. The theme is "[Chemistry Rocks](#)" and the experiments will be prepared and tested in advance. Typically, these experiments are designed to take 45 minutes to 1 hour. Depending on the travel distance, this should only require about two hours of your time and the rewards are huge. The kids really look forward to this and it is an opportunity to make science real for kids in elementary school.

We will be going to the schools from October 23rd through November 3rd and we will need teams for both, morning and afternoon. Please, discuss your participation and obtain approval from your direct supervisor prior to volunteering.

If interested to help, please respond ([Elena.Platon@P66.com](mailto:Elena.Platon@P66.com)) **by October 11<sup>th</sup>** with the dates that you are available and if you have a school preference. We will do our best to accommodate as many requests as possible.

**Dates:** October 23 – November 3

**Schools:** Bowering School, Copan Elementary, Dewey Elementary, Hoover Elementary, Jane Phillips, Osage Hills, Ranch Heights, Richard Kane Elementary, St. John Catholic School, Wayside Elementary, Wesleyan Christian, Wilson Elementary, Caney, OK Union

Thank you for your support!

The NCW Team
